A separate pool of assets and separate accounting records are maintained for each Subfund.

The figures presented in this report relate to the period from 1 October 2023 to 30 September 2024. They should not necessarily be taken as an indication of the future development of the Subfunds.

Subscriptions are only valid if made on the basis of the current Prospectus, the Articles of Incorporation, the Key Investor Information Document supplemented by the latest available audited Annual Report. If the latest Annual Report was published more than eight months ago, then the most recent Semi-Annual Report must also be made available.

The Prospectus, the Articles of Incorporation, the Key Investor Information Document as well as the respective Annual and Semi-Annual Reports can be obtained at the registered office of the Company or from the Management Company, the Custodian and each Paying and Information Agent without charge.

Some transactions conducted in the reporting period do no longer appear in the Investment Portfolio. The Statement of Changes in the composition of the securities portfolio during the reference period is available free of charge on request at the registered office of the Company and at the representatives where the Subfunds are distributed.

<sup>1)</sup> Not authorized in Hong Kong and not available to the public of Hong Kong.

<sup>2)</sup> This Sub-fund is not classified as an ESG fund in Hong Kong pursuant to the Commission's Circular to management companies of SFC-authorized unit trusts and mutual funds - ESG funds dated 29 June 2021 (as may be revised from time to time).

# Important notice to our Shareholders

The conflict between Russia and Ukraine is not just affecting political relations but is also having an impact on the economy. Both the sanctions imposed on Russia and other geopolitical developments led to more expensive and scarcer energy, higher inflation and interest rates, and supply chain problems during the reporting period. These effects are also reflected in capital markets, where prices are influenced by market movements. The global economy and capital markets continue to face high levels of uncertainty.

The Economic Sanctions issued against the Russian Federation, the separatist regions of Donetsk People's Republic and Luhansk People's Republic, and Belarus are constantly evolving. AllianzGI is complying with all relevant current and intends to comply with all relevant future sanctions. All trades that AllianzGI sends to its counterparties comply with AllianzGI's obligations under the relevant sanctions. AllianzGI has a globally coordinated economic sanctions team from the Legal, Compliance and Risk functions that monitors economic sanctions and coordinates their implementation. This team is actively monitoring the current situation and has been working with impacted departments, including portfolio management, trading and operations, to take relevant action and ensure timely implementation.

As of 30 September 2024, the Fund holds [direct] investments in Russia, or Belarus. These assets have been either fair valued with de minimis (i.e. near null), given the uncertainty of their value due to trading restrictions applicable under the relevant sanction regimes for these specific financial instruments or using 3rd party vendor data for financial instruments deemed as still tradeable even if under certain constraints. The statements included herein are as of the date provided and are subject to change.

AllianzGI has policies, procedures, and systems in place to screen new and existing investors against applicable sanctions lists. In relation to Article 5f of Regulation (EU) No 833/2014 and Article 1y of Regulation (EC) No 765/2006, AllianzGI has decided to stop selling any fund units/shares or securities to Russian and Belarussian nationals after 12 April 2022. In this regard, AllianzGI has instructed its distribution partners, fund platforms and service providers such as transfer agents to stop distributing fund units/shares to Russian and Belarussian nationals. Where Russian or Belarussian nationals hold units/shares in funds before 12 April 2022, AllianzGI has instructed their service providers to block the investor's account for subscriptions and other transactions which would constitute a sale of fund units/shares.

## Launch of new Subfunds

<sup>1)</sup> In the case of liquidation/merger the performance until the liquidation/merger date is shown.

\* The Net Asset Value calculation of Allianz Emerging Europe Equity (in liquidation) has been suspended with effect from 28th February 2022 due to current and ever-evolving circumstances associated with the Ukraine/Russia situation.

The calculation is based on the net asset value per share (excluding sales charge), assuming distributions, if any, were reinvested. The performance is calculated according to the method recommended by the German BVI (Bundesverband Investment und Asset Management e.V.).

Past performance is not an indication of current or future performance.

The performance data do not take account of the commissions and costs incurred on the issue and redemption of shares.

# Economic situation and capital market in the reporting period/outlook

## Global economy defies geopolitical risks

As at the end of September 2024, the global economy has remained on a growth trajectory overall in the year under review. This was mainly due to the fact that the US economy weakened only moderately and the prospect of further interest rate cuts buoyed investment. The stabilisation of the economy in Japan and the expansionary trends in China and other emerging markets also generally had a positive impact. By contrast, geopolitical stress factors such as the war in Ukraine and the conflicts in the Middle East had only a limited impact on global economic trends. Only in the eurozone did impetus remain relatively weak, with the deepening recession in the German industrial sector being a key contributing factor.

The monetary policy of central banks in developed economies diverged along different regional paths, as economic activity and inflationary trends developed inconsistently. In the eurozone, the European Central Bank reduced interest rates considerably in view of relatively weak economic activity; it did this in two rate cuts, the latest taking the rate to 3.65%. Given the more robust US economy, the US Federal Reserve did not follow suit until much later. Towards the end of the year under review, it reduced the range of its key interest rate to between 4.75 and 5.00% in a single rate cut. The Bank of Japan ended its long-standing negative interest rate policy and increased its key interest rate in two stages to 0.25% in view of increased inflationary trends.

## Equity markets: Consistently strong price growth

The global economy remained robust, and all major stock exchanges saw strong price increases. The most pronounced price upturn was in the United States, driven in particular by the favourable consumer environment and positive earnings performance in business. The European market as a whole saw the second-strongest growth of the developed economies. This was due in no small part to the above-average development of German blue chips, which benefited from their strong focus on the global market. The stock exchange in Japan took third place, primarily due to a fundamental change in sentiment after years of stagnating inflation. Expansionary global trends were also reflected in the sharply rising list prices in major emerging markets, underpinned by capital inflows from international investors.

## Bond markets: Declining interest rates boost prices

With the exception of Japan, bond markets recorded consistently strong value increases. Alongside current interest income, this trend was driven by generally strong price increases stemming from a noticeable decline in market yields. This reflected both the declining inflationary trends in most countries and the interest rate cuts by central banks, along with the expectation of monetary policy easing significantly in the near future. This overall trend benefited not only high-quality government and corporate bonds but also debt securities with a lower credit rating. This was reflected not least by the absence of any significant increase in payment defaults. In fact, the best results were seen with issuers of high-yield securities and bonds from emerging markets. For euro investors, however, investments denominated in US dollars suffered due to a sharp depreciation of the US currency.

## Outlook

### Equities

In our view, a “soft landing” continues to be the most likely scenario for the US economy. Economic growth could remain below its potential, however, leading in turn to increased downside risks. Meanwhile, Europe and Japan are showing signs of economic recovery, as are emerging markets. In general, companies should broadly benefit from interest rate cuts made by central banks and we continue to expect earnings to follow a predominantly positive trend. We therefore remain optimistic on the whole about the equity markets. We also expect that market participants will no longer focus on just a few highly capitalised technology stocks. However, the closing months of the year could see major price fluctuations, not least due to the US elections in November and the conflicts in the Middle East and Ukraine. There is also a risk of setbacks in Europe, where France and Germany in particular are struggling with domestic political problems and growth and financial stability appear vulnerable. In light of dynamic developments entailing both opportunities and risks, we believe that an active investment approach will be advantageous in allowing for a quick response to changes in the market environment.

### Outlook for bonds

As inflation declines and economic growth falters, more and more central banks are cutting their key interest rates to kick-start economies. We expect further rate cuts to be

made in the US before the year comes to a close. However, interest rates being reduced too sharply brings with it the risk of inflation rekindling. Failing to cut interest rates enough, however, could trigger a recession. Weak productivity development and rapid wage growth have dampened economic development in the eurozone. However, these negative influences are gradually diminishing and growth is expected to improve in 2025. We expect further interest rate cuts by the European Central Bank (ECB) for 2024. By contrast, the central bank in Japan is likely to raise its key interest rate further. Against this backdrop, we are for the most part positive about the yield prospects for traditional government bonds. We consider extended duration and positions aimed at steepening yield curves to be promising. In terms of corporate bonds, spreads for high-yield bonds and, to a lesser extent, investment-grade bonds appear rather tight. However, we still consider high-quality corporate bonds to be promising in view of falling interest rates and high demand. In our view, spreads for high-yield bonds no longer adequately compensate for the higher risk of default in many cases, and therefore a cautious approach would be advisable. Meanwhile, selected bonds from emerging markets offer attractive real returns.
